

V-Support

Velocity's V-Support enables clients to focus on their core business while knowing that our team monitors and maintains their network infrastructure, desktops, printers, and back-office services.

Save time and money – let Velocity manage your IT environment

Velocity provides industry-leading solutions to manage your computer systems and business technology all in one place. Our comprehensive suite of technology solutions and support services allows customers to concentrate on running their business instead of wasting time troubleshooting their devices. Our services manage your IT environment, including monitoring and maintaining desktop computers, printers, tablets, time clocks, network equipment, firewalls, and more. Velocity's expert professionals currently provide end-to-end, on-site, and remote managed services to more than 30,000 locations.

V-Support is designed to oversee the entire lifecycle of your IT needs from design, deployment, upgrades, day-to-day management, administration, patching, security, monitoring, and more. Velocity's overall approach to office IT services allows hotels, restaurants, retail, doctors' offices, theaters, and other branch-style office locations to focus on their day-to-day without struggling to run devices and programs.
