

# POTS In A BOX<sup>®</sup>

## A modern, affordable alternative to POTS

POTS In A BOX provides enterprises the core voice and data functionalities of POTS (Plain Old Telephone Service) without the slow-to-install and expensive copper infrastructure.

Velocity's solution, combining DataRemote's trusted hardware endpoints and Velocity's SIPBand network, provides reliable, managed SIP-based analog phone lines that connect to new or existing elevator emergency lines, security alarm system lines, fire panel lines, FAX machines, and other uses.

## What's Included

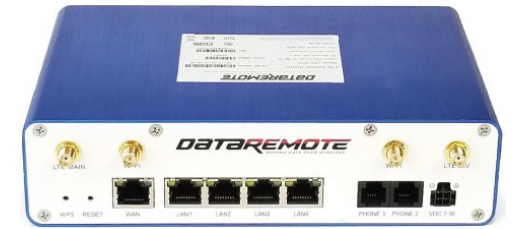

- Analog-to-SIP FXS gateway with simple, transparent, per line pricing
- Professional installation and connection to existing analog endpoints
- Proactive monitoring and managed support available 24x7x365
- Elimination of costly analog wireline services
- User-friendly management through Velocity's V-SELECT<sup>®</sup> interactive portal.

## Features

- Analog POTS line replacements
- Caller-ID
- E-911 support
- Integrated Battery Backup available
- Cellular 4G/LTE/5G backup support

## Applications

- Traditional voice services
- FAX transmissions
- Burglar and Fire Alarm transmissions
- Ring-Down Circuits (Auto Dial)
  - Elevator, paging, taxi lines
  - Call boxes, gate access, Point-of-Sale (POS) lines
