Consolidate your TEM set-up with a streamlined, intuitive platform and service delivery

Global Expense Management (GEM) helps businesses streamline all their processes related to technology expenses. The intuitive yet robust GEM SaaS is the ultimate tool for companies with multiple telecom suppliers. GEM is the right fit if you're struggling with your current TEM solution, have seen a drop in support, or are looking for a more robust and user-friendly solution that will scale with your business.

Save time on your telecom expense management processes, including invoice capture, auditing, payment management, and detailed analytics to plan for the future. GEM's AI and Robotic Process Automation executes day-to-day processes and quickly identifies abnormalities. GEM will help you see the overall picture of your technology expenses by supplier and service type to support your contract negotiations.

What's Included

- Auditing to ensure cost control and compliance
- Invoice visualization to optimize services and utilization
- Simplify your payment process to a single monthly payment
- Ability to input non-standard data sources
- Measured cost reduction through carrier life cycles
- Intuitive dashboards for detailed visualization of your telecom services

Benefits of GEM

- Consolidate and simplify your team's processes
- Automate process flow with AI and Machine Learning
- Optimize and document your telecom expenditure recovery and reduction
- Streamline audits, expense compliance and reporting
- Navigate renewals and negotiations with ease
- Make one easy, simplified payment for all your telecom expenses
